What is this product?

Type

FCP

Objectives

The fund aims to achieve an annualized performance net of fees in excess of 50% of the Markit IBOXX EUR Liquid Corporates Diversified Total Return index and 50% of the Markit IBOXX EUR Liquid High Yield Total Return index over a recommended minimum investment horizon of 3 years.

Intended retail investor

The fund is intended for retail and institutional investors.

What are the risks and what could I get in return?

Risk Indicator

The risk indicator assumes you keep the product for 3 years.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 2 out of 7, which is a low risk class.

This rates the potential losses from future performance at a low level, and poor market conditions are very unlikely to impact our capacity to pay you.

You can find more information about the other risks in the prospectus at: <https://www.octo-am.com/FR/fr/docs/funds/octo-credit-value/PROSPECTUS>

This product does not include any protection from future market performance so you could lose some or all of your investment.

If we are not able to pay you what is owed, you could lose your entire investment. However, you may benefit from a consumer protection scheme (see the section 'what happens if we are unable to pay you'). The indicator shown above does not consider this protection.

Performance Scenarios

The figures shown include all the costs of the product itself. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product a suitable benchmark over the last 10 years. Markets could develop very differently in the future.

The stress scenario shows what you might get back in extreme market circumstances.

Unfavourable scenario: this type of scenario occurred for an investment between 30/09/2019 and 30/09/2022

Moderate scenario: this type of scenario occurred for an investment between 30/12/2016 and 31/12/2019

Favourable scenario: this type of scenario occurred for an investment between 31/12/2018 and 31/12/2021

This product cannot be easily cashed in.

Recommended Holding Period: 3 years

Exemple Investment: 10 000 €

Scenarios		If you exit after 1 year	If you exit after 3 years
Minimum	There is no minimum guaranteed return. You could lose some or all of your investment.		
Stress	What you might get back after costs	6 910 €	7 220 €
	Average return each year	-30,9%	-10,3%
Unfavourable	What you might get back after costs	8 060 €	8 540 €
	Average return each year	-19,4%	-5,1%
Moderate	What you might get back after costs	9 600 €	9 820 €
	Average return each year	-4,0%	-0,6%
Favourable	What you might get back after costs	11 150 €	10 650 €
	Average return each year	11,5%	2,1%

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Cost over Time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

These figures do not include the product costs.

We have assumed:

- In the first year you would get back the amount that you invested (0 % annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.
- 10 000 euros is invested.

	If you exit after 1 year	If you exit after 3 years
Total costs	732 €	1 252 €
Annual cost impact (*)	7,3%	4,1%

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 3,5% before costs and -0,6% after costs. We may share part of the costs with the person selling you the product to cover the services they provide to you.

Composition of Costs

		Annual cost impact if you exit after 3 years
One-off costs upon entry or exit		
Entry costs	5,00% of the amount you pay in when entering this investment.	1,7%
Exit costs	We do not charge an exit fee for this product.	0,0%
Ongoing costs taken each year		
Management fees and other administrative or operating costs	1,61% of the value of your investment per year. This is an estimate based on actual costs over the last year.	1,7%
Transaction costs	0,42% of the value of your investment per year. This is an estimate of the costs incurred when we buy and sell the underlying investments for the product. The actual amount will vary depending on how much we buy and sell.	0,4%
Incidental costs taken under specific conditions		
Performance fees	0,29%. The actual amount will vary depending on how well your investment performs. The aggregated cost estimation above includes the average over the last 5 years.	0,3%
