The Commissariat aux Assurances (CAA) is responsible for supervising BPCE Life in relation to this Key Information Document.

**You are about to purchase a product that is not simple and may be difficult to understand**

## What is this product?

**Type**  
SICAV

### Objectives

Principal assets traded: Bonds and other debt securities denominated primarily in currencies of developed countries and secondarily in local currencies issued by private issuers, issued or guaranteed by governments of emerging countries, public entities and semi-public issuers operating in emerging countries. Investment strategy: The fund seeks to achieve capital growth by investing in the principal assets traded and to outperform the benchmark. The management team makes discretionary investment choices based on economic/financial analyses. The fund promotes, among other characteristics, environmental and/or social characteristics but does not have sustainable investment as its objective. Environmental, social and governance (ESG) criteria contribute to the asset manager's decision-making but are not a decisive factor in this decision-making. For more information, please see the management company's website and/or the prospectus. The fund may make use of derivative products for both investment and hedging purposes (to protect against future unfavourable financial events). Benchmark: J.P. Morgan EMBI Global Diversified (Total Return). The fund is managed actively and the investment approach implies a reference to a benchmark (the index). Benchmark definition: The index measures the performance of emerging market, USD-denominated sovereign and quasi-sovereign bonds, through a diversification scheme allowing the weightings to be shared more equally between the countries in the index. Use of the benchmark: - as an investment universe. In general, the issuers of financial instruments contained in the fund portfolio are mostly contained in the index. However, investments outside this index are authorised, - in determining risk levels/parameters, - for performance comparison purposes, - to calculate the performance fee for some share classes. Divergence of portfolio composition from the benchmark: As the fund is managed actively, it does not aim to invest in each component of the index nor to invest in the same proportions as the components of the index. In normal market conditions, the expected tracking error of the fund will be large, i.e. above 2.5%. This measure is an estimation of the divergence of the fund's performance compared to the performance of the benchmark. The greater the tracking error, the greater the deviations from the benchmark index. The actual tracking error depends in particular on market conditions (volatility and correlations between financial instruments) and may therefore differ from the expected tracking error.

### Intended retail investor

This product is for investors who meet the conditions for accessing the product in question (see prospectus) with any level of knowledge and experience who are looking for Capital Growth. This product can be used as a core holding or a component of a diversified portfolio for investments with an investment horizon of 4 years. Investors should understand the product risks and only invest if they can bear potentially substantial losses.

## What are the risks and what could I get in return?

### Risk Indicator

The risk indicator assumes you keep the product for 4 years.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 3 out of 7, which is a medium-low risk class.

This rates the potential losses from future performance at a medium-low level, and poor market conditions are unlikely to impact the capacity of the fund to pay you.

Be aware of currency risk. You will receive payments in a different currency, so the final return you will get depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

Other risk(s) materially relevant not included in the SRI: Credit. Counterparty. Derivatives. Emerging markets. Liquidity. Sustainability. This product does not include any protection from future market performance so you could lose some or all of your investment. If we are not able to pay you what is owed, you could lose your entire investment. However, you may benefit from a consumer protection scheme (see the section 'what happens if we are unable to pay you'). The indicator shown above does not consider this protection.

## Performance Scenarios

The figures shown include all the costs of the product itself. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product over the last 10 years.. Markets could develop very differently in the future.

The stress scenario shows what you might get back in extreme market circumstances.

The unfavourable scenario occurred for an investment between 10/2018 and 09/2022.

The moderate scenario occurred for an investment between 07/2014 and 06/2018.

The favourable scenario occurred for an investment between 02/2016 and 01/2020.

This product cannot be easily cashed in.

<b>Recommended Holding Period:</b> 4 years			
<b>Exemple Investment:</b> 10 000 €			
Scenarios		If you exit after 1 year	If you exit after 4 years
<b>Minimum</b>	<b>There is no minimum guaranteed return. You could lose some or all of your investment.</b>		
<b>Stress</b>	<b>What you might get back after costs</b>	3 990 €	4 340 €
	Average return each year	-60,1%	-18,8%
<b>Unfavourable</b>	<b>What you might get back after costs</b>	7 040 €	7 690 €
	Average return each year	-29,6%	-6,4%
<b>Moderate</b>	<b>What you might get back after costs</b>	9 800 €	10 830 €
	Average return each year	-2,0%	2,0%
<b>Favourable</b>	<b>What you might get back after costs</b>	11 470 €	12 850 €
	Average return each year	14,7%	6,5%

## What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

## Cost over Time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

These figures do not include the product costs.

We have assumed:

- In the first year you would get back the amount that you invested (0 % annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.

- 10 000 euros is invested.

	If you exit after 1 year	If you exit after 4 years
<b>Total costs</b>	425 €	1 076 €
<b>Annual cost impact (*)</b>	4,3%	2,4%

(\*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 4,4% before costs and 2,0% after costs. We may share part of the costs with the person selling you the product to cover the services they provide to you.

## Composition of Costs

		Annual cost impact if you exit after 4 years
<b>One-off costs upon entry or exit</b>		
<b>Entry costs</b>	2,50% of the amount you pay in when entering this investment.	0,6%
<b>Exit costs</b>	We do not charge an exit fee for this product.	0,0%
<b>Ongoing costs taken each year</b>		
<b>Management fees and other administrative or operating costs</b>	1,40% of the value of your investment per year. This is an estimate based on actual costs over the last year.	1,4%
<b>Transaction costs</b>	0,35% of the value of your investment per year. This is an estimate of the costs incurred when we buy and sell the underlying investments for the product. The actual amount will vary depending on how much we buy and sell.	0,4%
<b>Incidental costs taken under specific conditions</b>		
<b>Performance fees</b>	There is no performance fee for this product.	0,0%
