The Commissariat aux Assurances (CAA) is responsible for supervising BPCE Life in relation to this Key Information Document.

You are about to purchase a product that is not simple and may be difficult to understand

What is this product?

Type

The Fund is a sub-fund of BlackRock Global Funds, an umbrella company incorporated in Luxembourg, authorised by the Commission de Surveillance du Secteur Financier as a Undertaking for Collective Investment in Transferable Securities ("UCITS").

Objectives

The Fund aims to generate an above average level of income on your investment as well as maintain long term capital growth. The Fund invests globally in the full range of assets in which a UCITS fund may invest, including equity securities (e.g. shares), fixed income securities (such as bonds), funds, cash, deposits and money market instruments (i.e. debt securities with short term maturities). The Fund is actively managed and the asset classes and the extent to which the Fund is invested in these may vary without limit depending on market conditions and other factors at the investment adviser's (IA) discretion. The IA may refer to a composite benchmark comprising MSCI World Index (50%) and Bloomberg Global Aggregate Bond Index USD Hedged (50%) (the "Index") for risk management purposes to ensure that the active risk (i.e. degree of deviation from the Index) taken by the Fund remains appropriate given the Fund's investment objective and policy. The IA is not bound by the components or weighting of the Index when selecting investments. The IA may also use its discretion to invest in securities not included in the Index in order to take advantage of specific investment opportunities. The Fund's portfolio holdings are expected to deviate materially from the Index. The components of the Index (i.e. MSCI World Index and Bloomberg Global Aggregate Bond Index US Hedged) may be quoted separately in marketing material related to the Fund. The Fund's investments may be issued by governments, government agencies, companies and supranationals (e.g. the International Bank for Reconstruction and Development). These may include securities with a relatively low credit rating or which are unrated. The assets held by the Fund may be denominated in a wide variety of currencies. The Fund distributes income gross of expenses. The IA may use financial derivative instruments (FDIs) (i.e. investments the prices of which are based on one or more underlying assets) for investment purposes in order to achieve the investment objective of the Fund, and/or to reduce risk within the Fund's portfolio, reduce investment costs and generate additional income. The Fund may, via FDIs, generate varying amounts of market leverage (i.e. where the Fund gains market exposure in excess of the value of its assets). The Fund invests in fixed income securities, equity securities and collective investment schemes and so the value of your investment may be affected by the factors which impact the value of those asset classes. The return on your investment in the Fund is directly related to the value of the underlying assets of the Fund, less costs (see "What are the costs?" below). The relationship between the return on your investment, how it is impacted and the period for which you hold your investment is considered below (see "How long should I hold it and can I take my money out early?"). The depositary of the Fund is The Bank of New York Mellon SA/NV, Luxembourg Branch. Further information about the Fund can be obtained from the latest annual report and half-yearly reports of the BlackRock Global Funds. These documents are available free of charge in English and certain other languages. These can be found, along with other (practical) information, including prices of units, on the BlackRock website at: www.blackrock.com or by calling the International Investor Servicing team on +44 (0) 20 7743 3300. Your shares will be non-distributing (i.e. dividend income will be included in their value). The Fund's base currency is US Dollar. Shares for this class are bought and sold in Euro. The performance of your shares may be affected by this currency difference. Your shares will be "hedged" with the aim of reducing the effect of exchange rate fluctuations between their denominated currency and the base currency of the Fund. The hedging strategy may not completely eliminate currency risk and, therefore, may affect the performance of your shares. You can buy and sell your shares daily. The minimum initial investment for this share class is US\$5,000 or other currency equivalent.

Intended retail investor

The Fund is intended for retail investors with the ability to bear losses up to the amount invested in the Fund (see "How long should I hold it and can I take my money out early?").

What are the risks and what could I get in return?

Risk Indicator

The risk indicator assumes you keep the product for 5 years.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 3 out of 7, which is a medium-low risk class.

This rates the potential losses from future performance at a medium-low level, and poor market conditions are unlikely to impact our capacity to pay you.

Be aware of currency risk. If you receive payments in a currency that is different to the product's base currency, the final return you will get depends on the exchange rate between the two currencies. This risk is not considered in the indicator shown above. Please refer to the product's Prospectus or AIFMD Disclosure for details of other materially relevant risks that may apply to this product. This product does not include any protection from future market performance so you could lose some or all of your investment. If the product is not able to pay you what is owed, you could lose your entire investment.

This product does not include any protection from future market performance so you could lose some or all of your investment.

If we are not able to pay you what is owed, you could lose your entire investment. However, you may benefit from a consumer protection scheme (see the section 'what happens if we are unable to pay you'). The indicator shown above does not consider this protection.

Performance Scenarios

The figures shown include all the costs of the product itself. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product over the last 10 years.. Markets could develop very differently in the future.

The stress scenario shows what you might get back in extreme market circumstances.

So far, all the elements concerning the performance detail of the fund have not been provided by the asset manager.

This product cannot be easily cashed in.

Recommended Holding Period: 5 years			
Exemple Investment: 10 000 €			
Scenarios		If you exit after 1 year	If you exit after 5 years
Minimum	There is no minimum guaranteed return. You could lose some or all of your investment.		
Stress	What you might get back after costs	8 050 €	5 360 €
	Average return each year	-19,5%	-11,7%
Unfavourable	What you might get back after costs	8 690 €	9 050 €
	Average return each year	-13,1%	-2,0%
Moderate	What you might get back after costs	9 820 €	10 720 €
	Average return each year	-1,8%	1,4%
Favourable	What you might get back after costs	11 350 €	12 140 €
	Average return each year	13,5%	3,9%

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Cost over Time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

These figures do not include the product costs.

We have assumed:

- In the first year you would get back the amount that you invested (0 % annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.

- 10 000 euros is invested.

	If you exit after 1 year	If you exit after 5 years
Total costs	713 €	1 819 €
Annual cost impact (*)	7,1%	3,2%

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 4,6% before costs and 1,4% after costs. We may share part of the costs with the person selling you the product to cover the services they provide to you.

Composition of Costs

		Annual cost impact if you exit after 5 years
One-off costs upon entry or exit		
Entry costs	5,00% of the amount you pay in when entering this investment.	1,0%
Exit costs	We do not charge an exit fee for this product.	0,0%
Ongoing costs taken each year		
Management fees and other administrative or operating costs	1,77% of the value of your investment per year. This is an estimate based on actual costs over the last year.	1,8%
Transaction costs	0,36% of the value of your investment per year. This is an estimate of the costs incurred when we buy and sell the underlying investments for the product. The actual amount will vary depending on how much we buy and sell.	0,4%
Incidental costs taken under specific conditions		
Performance fees	There is no performance fee for this product.	0,0%
