What is this product?

Type

SICAV

Objectives

The investment objective of the Product is to outperform the Bloomberg Euro Govt inflation linked 1 to 10 Year Treasury Index over its recommended minimum investment period of two years. The Bloomberg Euro Govt Inflation Linked Bond 1 to 10 Year Treasury Index is an index tracking the performance of the Euro zone governments' inflation-linked bonds. The Product promotes environmental or social characteristics but does not have as its objective a sustainable investment. Its SRI investment strategy is based on incorporating ESG factors into the research, applying an SRI selection process and an exclusion policy. The investment team systematically assess for each underlying issuer, whether the extra-financial dimensions impact the issuer's credit risk profile, both in terms of risk and opportunity, as well as their probability of occurrence. Thus, extra-financial dimensions are systematically integrated into the risk assessment and fundamental analysis of both private and public issuers. The investment team systematically assess for each underlying issuer, whether the extra-financial dimensions impact the issue. The Product adopts an ESG process based on the average rating method: the Product's average ESG rating is never lower than that of the Reference Index. The investment policy of the Product, lies on an active management process combining:- Allocation between fixed income asset classes, modified duration, real rates curve and credit and- Selection of fixed income securities for the portfolio. After analysing the key factors determining the evolution of real yields and inflation rates, the portfolio is built according to an allocation using several sources of added value (i.e: exposure to real rates, positioning on the real yield curves, arbitrage within Euro-zone countries and within inflation reference Index (for instance, French inflation against Euro-Zone Inflation), exposure to nominal rates, exposure to international (i.e. non-Euro zone) inflation-linked bonds systematically currency hedged, up to 10% of its net assets).

Intended retail investor

The Product is suitable for institutional and retail investors who: are looking for an exposure to the inflation-linked bonds; can afford to set aside capital for a long period of time (over 2 years); and can accept capital losses.

What are the risks and what could I get in return?

Risk Indicator

The risk indicator assumes you keep the product for 2 years.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 3 out of 7, which is a medium-low risk class.

This rates the potential losses from future performance at a medium-low level, and poor market conditions are unlikely to impact our capacity to pay you.

These risks are materially relevant to the fund but are not captured by the SRI, credit risk.

This product does not include any protection from future market performance so you could lose some or all of your investment.

If we are not able to pay you what is owed, you could lose your entire investment. However, you may benefit from a consumer protection scheme (see the section 'what happens if we are unable to pay you'). The indicator shown above does not consider this protection.

Performance Scenarios

The figures shown include all the costs of the product itself. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the

product over the last 10 years.. Markets could develop very differently in the future.
The stress scenario shows what you might get back in extreme market circumstances.

This type of scenario occurred for an investment between 2015-03-31 and 2017-03-31.

This type of scenario occurred for an investment between 2014-10-31 and 2016-10-31.

This type of scenario occurred for an investment between 2020-03-31 and 2022-03-31.

This product cannot be easily cashed in.

Recommended Holding Period: 2 years			
Exemple Investment: 10 000 €			
Scenarios		If you exit after 1 year	If you exit after 2 years
Minimum	There is no minimum guaranteed return. You could lose some or all of your investment.		
Stress	What you might get back after costs	6 660 €	7 700 €
	Average return each year	-33,4%	-12,3%
Unfavourable	What you might get back after costs	9 290 €	9 270 €
	Average return each year	-7,1%	-3,7%
Moderate	What you might get back after costs	9 830 €	10 040 €
	Average return each year	-1,7%	0,2%
Favourable	What you might get back after costs	10 730 €	11 550 €
	Average return each year	7,3%	7,5%

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Cost over Time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

These figures do not include the product costs.

We have assumed:

- In the first year you would get back the amount that you invested (0 % annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.
- 10 000 euros is invested.

	If you exit after 1 year	If you exit after 2 years
Total costs	344 €	451 €
Annual cost impact (*)	3,4%	2,2%

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 2,4% before costs and 0,2% after costs. We may share part of the costs with the person selling you the product to cover the services they provide to you.

Composition of Costs

		Annual cost impact if you exit after 2 years
One-off costs upon entry or exit		
Entry costs	2,50% of the amount you pay in when entering this investment.	1,3%
Exit costs	We do not charge an exit fee for this product.	0,0%
Ongoing costs taken each year		
Management fees and other administrative or operating costs	0,88% of the value of your investment per year. This is an estimate based on actual costs over the last year.	0,8%
Transaction costs	0,06% of the value of your investment per year. This is an estimate of the costs incurred when we buy and sell the underlying investments for the product. The actual amount will vary depending on how much we buy and sell.	0,1%
Incidental costs taken under specific conditions		
Performance fees	There is no performance fee for this product.	0,0%
