## What is this product?

### Type

SICAV

### Objectives

The investment objective of Thematics AI and Robotics Fund (the “Fund”) is long-term growth of capital through an investment process systematically including Environmental, Social and Governance considerations. This Fund may be appropriate for investors who can afford to set aside capital for 5 years. The Fund promotes environmental or social characteristics but does not have as its objective a sustainable investment. However, it invests partially in assets that have a sustainable objective. The Fund invests primarily in equity securities of companies identified as participating or having an exposure to the potential growth relating to the investment theme of the global artificial intelligence (AI) and robotics. As part of the responsible approach of the Fund, the Investment Manager excludes controversial activities deemed to have a significant negative impact on the achievement of social and environmental objectives. The Investment Manager derives an internal ESG risk score in percentage. This ESG scoring is then rounded to 0 or 1, and carries an equal weight (25%) as the other criteria (Quality, Trading Risk and Management) considered in weighing each stock. While the review of the ESG criteria permanently cover at least 90% of the Fund’s net assets, a low ESG score does not exclude a stock from the portfolio, but it will limit its position size. These in-depth analyses result in selecting companies assessed to practice good governance and whose activities do not significantly harm the achievement of sustainable development. In order to measure the effectiveness of the ESG approach implemented, the Investment Manager ensures that the Fund permanently has a better ESG rating than its Reference index after eliminating at least 20% of the worst-rated securities of the latter. The Investment Manager relies on the data from third party providers to monitor this rating upgrade approach. For additional information, please refer to the “ESG Policy” of the Investment Manager available on its website. The Fund is unconstrained by industry, index, currency, geography or capitalization size.

### Intended retail investor

The Product is suitable for institutional and retail investors who are looking for exposure to equity markets on a global basis; are looking for a relatively concentrated portfolio; can afford to set aside capital for 3 to 5 years (medium to long term horizon); can accept significant temporary losses; and can tolerate volatility.

## What are the risks and what could I get in return?

### Risk Indicator

The risk indicator assumes you keep the product for 5 years.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 5 out of 7, which is a medium-high risk class.

This rates the potential losses from future performance at a medium-high level, and poor market conditions will likely impact our capacity to pay you.

These risks are materially relevant to the fund but are not captured by the SRI, liquidity risk, Stock connect risk.

This product does not include any protection from future market performance so you could lose some or all of your investment.

If we are not able to pay you what is owed, you could lose your entire investment. However, you may benefit from a consumer protection scheme (see the section ‘what happens if we are unable to pay you’). The indicator shown above does not consider this protection.

## Performance Scenarios

The figures shown include all the costs of the product itself. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product a suitable benchmark over the last 10 years. Markets could develop very differently in the future.

The stress scenario shows what you might get back in extreme market circumstances.

The unfavourable scenario occurred for an investment (in reference to benchmark: 100% MSCI ACWI NET TOTAL RETURN USD INDEX) between 2021-12-31 and 2024-01-31.

The moderate scenario occurred for an investment (in reference to benchmark: 100% MSCI ACWI NET TOTAL RETURN USD INDEX) between 2018-02-28 and 2023-02-28.

The favourable scenario occurred for an investment (in reference to benchmark: 100% MSCI ACWI NET TOTAL RETURN USD INDEX) between 2016-10-31 and 2021-10-29.

This product cannot be easily cashed in.

<b>Recommended Holding Period:</b> 5 years			
<b>Exemple Investment:</b> 10 000 €			
Scenarios		If you exit after 1 year	If you exit after 5 years
<b>Minimum</b>	There is no minimum guaranteed return. You could lose some or all of your investment.		
<b>Stress</b>	<b>What you might get back after costs</b>	1 250 €	1 190 €
	Average return each year	-87,5%	-34,6%
<b>Unfavourable</b>	<b>What you might get back after costs</b>	6 990 €	9 570 €
	Average return each year	-30,1%	-0,9%
<b>Moderate</b>	<b>What you might get back after costs</b>	10 500 €	16 220 €
	Average return each year	5,0%	10,1%
<b>Favourable</b>	<b>What you might get back after costs</b>	15 900 €	21 670 €
	Average return each year	59,0%	16,7%

## What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

### Cost over Time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

These figures do not include the product costs.

We have assumed:

- In the first year you would get back the amount that you invested (0 % annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.

- 10 000 euros is invested.

	If you exit after 1 year	If you exit after 5 years
<b>Total costs</b>	610 €	2 526 €
<b>Annual cost impact (*)</b>	6,1%	3,2%

(\*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 13,3% before costs and 10,1% after costs. We may share part of the costs with the person selling you the product to cover the services they provide to you.

## Composition of Costs

		Annual cost impact if you exit after 5 years
<b>One-off costs upon entry or exit</b>		
<b>Entry costs</b>	4,00% of the amount you pay in when entering this investment.	0,9%
<b>Exit costs</b>	We do not charge an exit fee for this product.	0,0%
<b>Ongoing costs taken each year</b>		
<b>Management fees and other administrative or operating costs</b>	2,05% of the value of your investment per year. This is an estimate based on actual costs over the last year.	2,2%
<b>Transaction costs</b>	0,05% of the value of your investment per year. This is an estimate of the costs incurred when we buy and sell the underlying investments for the product. The actual amount will vary depending on how much we buy and sell.	0,1%
<b>Incidental costs taken under specific conditions</b>		
<b>Performance fees</b>	There is no performance fee for this product.	0,0%
